

Assessment Bootstrap

1. Given a basic Bootstrap layout, write the HTML code to create a navbar with a brand name, a search bar, and two navigation links aligned to the right.
2. Write the HTML to create a Bootstrap card with an image at the top, a card body containing a title and text, and a footer.
3. Create a Bootstrap form with inline form controls, including a text input, a password input, and a submit button.
4. Create a Bootstrap carousel with three slides. The first slide should contain an image, the second slide should contain a caption only, and the third slide should contain both an image and a caption. Include indicators and controls for navigation.
5. Design a Bootstrap progress bar that shows an animated progress from 0% to 100%. Include a label indicating the current progress percentage.
